

Emerald Cave Recordings

The Emerald Cave Recordings are an anthology of unique, long-playing, extremely high-quality publications in audio CD format, all featuring an extensive assortment of “***Nature Sounds***,” nearly (99.9%) free of all human-made sounds. These “as-is” recordings represent just a few of the hundreds of “live” samplings acquired over a period of a few years in all seasons and assorted climatic conditions. All tracks are authentic reproductions, as if you were sitting at the focal point between the pair of widely spaced microphones, in the middle of the woods, as Nature presents Her “***Concerts for all Seasons***.” All tracks have been prepared with no enhancements, no loops or repeats (*all unique*), and no mixing. Nature’s tones and timber, melodies, rhythms, instrumentation, composition, orchestration, and presentation set a standard that all human sounds fail to emulate, even from the best of human composers, arrangers, and performers. These trips into pure Nature are the new definition of “***Reality CDs***.”

Offerings:

Title	Part#	ISBN	Playing Time:	Featured Sounds	Wholesale Price ea.

Emerald Cave Recordings

How to Obtain:

GUSTECH Publishing provides all of its audio CD products using wholesale distribution only. Our current relationships with resellers include deep-discounted inventory and consignment stocking, light bulk shipments, “drop shipping” services, and “fund-raising” support services. Since we desire to share-the-wealth, we do not sell retail ourselves.

When a new retailer opens an account with GUSTECH, we send several files containing various sales documents and support flyers, some of which may be modified to suit the individual needs of the retailer. We send a high resolution JPEG of the CD label for the ECC1 product, and can send individual CD label JPEGs on request to support sales and advertising activities.

We supply, on indefinite loan, an *Emerald Cave “Nature” Recordings Sampler Audio CD* to shop-based resellers, and to “show” vendors, for your customers’ listening enjoyment. This 57 minute Sampler CD is not for sale, and has no ISBN assignment. The first six tracks present only 8 minutes and 30 seconds ($\approx 10.8\%$ of ≈ 79 minutes per CD) of sample sounds from each of the six CDs (EC1→EC6) listed (in the table). The seventh track is a 6-minute compilation consisting of just 1 minute each of these six CDs.

For feedback or general inquiries, please contact us at your convenience.
